

To whom it may concern:

I am writting because I am concerned that my local K-LOVE stations (89.1, 91.9, 88.1) may be replaced by a LPFM signal. I feel that K-LOVE provides a well rounded Christian Radio station to rural residents in Nebraska. Giving us wholesome encouraging content that doesn't have to be filtered of the filth other stations are allowed to promote.

If K-LOVE is replaced by a LPFM station there is only a small chance the new station will be another Christian radio station with the researched and quality programming K-LOVE provides. I drive across the state of Nebraska at least once a month, if K-LOVE was not on the air I would be required to listen to radio stations that I would be embarrassed to listen to with my parents. Please don't allow the Low Power FM stations to lower the standards in Nebraska.

K-LOVE provides hope in millions of homes across the United States. Bringing thousands of new believers to Christ every year through their ministry. Because they are a non-profit station the FCC already requires them to raise money to broadcast in our area. We have proved that we want and need a Christian radio station. Please don't take that away from us.

Thank you for taking my concerns into consideration before making a final decision about allowing LPFM broadcast services taking priority over FM translators.

Regards,  
Jennie M. Martin
